5. WhatsApp subscription journey (cross-cutting, checkout flow)

Step	Screen	What happens / [SCREEN TO PASTE]	User action
5.1	Nudge - in context	Same component, contextual copy per placement. E.g. "Get reminded for every Ekadashi" on an article, generic on Panchang, high-emphasis post-booking. [SCREEN: Subscription nudge - any placement]	Tap the nudge card

5.5	WhatsApp welcome message	First message - welcome + next concrete reminder date + opt-out instructions ("Reply STOP"). [SCREEN: WhatsApp welcome message]	Message received - reminders begin
5.6	Recurring panchang broadcast	Ongoing - a panchang-based message is broadcast to the full subscriber database, same content for everyone (not personalized). Each message includes 3 action buttons - Complete Ritual Guide, Buy Ritual Kit, Book a Purohit. [SCREEN: WhatsApp panchang broadcast - NOT YET DESIGNED] <i>Tapping a button deep-links into the matching journey - section 1, the new kit checkout (1.3), or section 3</i>	Tap a button in WhatsApp

Open items - not yet resolved

Flagged during this design pass. Needs a decision before dev handoff is final.

#	Item
1	Save/bookmark action on the Ritual Guides article page - needed to feed the "Saved rituals" count on the account profile.
2	Language setting conflict - account-level toggle vs per-article toggle. Pick one source of truth.
3	Auto-renewal logic for the WhatsApp subscription - auto-charge next year, or lapse and require fresh opt-in.
4	WhatsApp Business API vendor selection (e.g. Gupshup, Interakt) - needed for template approval, including the new recurring broadcast (5.6).
5	Standalone Ritual Kit checkout (1.3) has no designed screens yet - contents list, quantity, delivery address, payment.
6	Pandit language-matching against the app's Hindi/English toggle - not yet wired into pandit selection logic.
7	Bhajan Mandali booking model - instant confirm vs request-based ("Check availability") - changes the post-submit flow.
8	Error / empty states (no internet, no pandits available in city, payment failed) - explicitly deferred, not in this pass.
9	Panchang menu row "flipping block" (0.2) showing live today's-panchang inside the nav - needs technical scoping for an animated/live-data nav element.
10	Recurring panchang broadcast (5.6) - confirm send frequency (daily/weekly), and confirm the 3 action buttons deep-link correctly per subscriber's relevant puja/kit.
