

an overview

this platform is - and is not

com is a knowledge-first dharmic ritual platform operating as a Dharmic Operating System. The guiding principle is knowledge before commerce. With a question about a ritual and leaves with the knowledge to perform it correctly, the materials to do so, and the option to have a verified purohit

	A scripturally-sourced editorial platform with commerce built on top of knowledge.
POSITIONED AS	Another puja store, a pandit booking app, a gifting brand, or a devotional content aggregator.
	Mobile-first. Desktop is a responsive adaptation of the same design system.
	An app (native iOS or Android). Web only for all phases in this PRD.
IONED AS	Fear-free by design. No copy, UX pattern, or empty state implies ritual failure or consequence. Premium. Minimal. Not Loud.
	An astrology platform. Panchang data is used only for ritual timing, not prediction.

Content categories - MVP

	Description + Phase
Vidhis	Editorial articles: step-by-step vidhi, significance, mantra, samagri. DPB-classified. Phase 1.
Utsav	Live calendar data: tithi, nakshatra, vrat dates, muhurat. Delhi-NCR default. Phase 1.
Samagris	E-commerce: complete samagri kits for specific pujas. 14 SKUs at launch. Phase 2–3.
Service with Purohit	Service booking: verified pandits, kit bundled, 6 puja types. Phase 4.

Classification system - editorial backbone and IP of The Tapa Co.

Qual claim on the platform is classified using the DPB system. This is non-negotiable and must be supported by the CMS and displayed in the UI.

	Definition and display rule
Scriptural	Scripturally mandated. Citable to a named text (e.g. Shiva Purana, Rudra Samhita / Parvati Khanda). Green tag. Minimum 3/5 confidence score required.
Regional	Regional or family custom. Not citable to a specific text. Amber tag. Confidence $\leq 2/5$.
Myth	Fear-based misconception. Displayed as a corrected myth card (question in pink, answer in green). No confidence score - just a corrected badge.
Combined	Article contains both Dharma and Pratha elements. Shown as a combined tag.
NG	Date/timing content only. No DPB tag. No confidence score. Per Addendum 14.1.

Color system - color tokens (locked)

These are the only colors used across the entire platform. No exceptions. All HTML reference files produced in this project use these tokens.

	Hex + usage rule
Background	#F2EDE4 - page background throughout
Card	#FFFFFF - all card surfaces

	#1C1712 - nav, audio bar, dark CTAs, announcement bar, footer
	#D4175A - all primary CTAs, active states, Bhranti tags, countdown badges
	#E8A020 - step circles, mantra text, Devanagari on dark
light	#FFF8E8 - mode selector, sankalpa card, intelligence layer background
text	#8B6914 - labels on amber surfaces, source references
ext	#2C2010 - all body copy
xt	#5C4B12 - section descriptions, step descriptions
ct	#8A7A68 - captions, secondary labels
	#E8E0D0 - all card and component borders
og / --green-	#EBF5EC / #1A5C28 - Dharma tags, live badges, recommended options
ht	#FEF0F4 - myth question card background, Bhranti tags
ext	#FFFDF5 - all text on dark backgrounds
	#E3B567 - hero eyebrow, section labels on dark, Panchang headings

nent-level specifications for each UI element are in the companion document: *Tapa Web Flow Development Brief v1.0*. HTML reference files produced for homepage (desktop + mobile), article page (desktop + mobile), and Panchang page (desktop) are available as working references. Do not deviate without written approval. Only UI Slices to be added for aesthetics.

Technical architecture

Preferred technology decisions

All decisions must be confirmed and contracts signed before any build begins. All decisions require written sign-off from Komal Gupta before implementation.

Requirement	Requirement
Frontend framework	Next.js (App Router). SSR required for article pages (SEO). ISR for Panchang data. Static export not acceptable - dynamic rendering is a core requirement.
Hosting	Vercel (preferred, native Next.js support) or AWS with CloudFront. Must support ISR + edge functions. Shared hosting not acceptable.
Backend	Headless CMS. Recommended: Sanity.io or Contentful. Must support: custom content types, DPB field tags, boolean features (kits_launched, purohit_tab_visible), rich text with inline image placement, WhatsApp teaser field, kit_linked_slug field.

Panchang API	Drik Panchang API (or equivalent with equivalent data coverage). Must return: tithi, paksha, nakshatra, yoga, karana, sunrise, sunset, moonrise, moonset, festivals[], rahu_kaal, abhijit_muhurat for any city/date. Tapa backend must proxy this - never expose the third-party API directly to the frontend.
Caching	Cache: daily Panchang 24 hrs, festival calendar 30 days, muhurat 7 days. Store snapshots in DB for offline resilience. Default city: Delhi-NCR (lat: 28.6139, lon: 77.2090).
Auth	Phone OTP +91 default, but access for US & UK codes too in future. 6-digit code. 28-second resend timer. No email, no social login, no password. Firebase Auth (Phone) or Twilio Verify.
DB	PostgreSQL (Supabase or RDS). Schema specified in Section 6.
Payment gateway	Razorpay done. Must support: UPI, credit/debit card, netbanking. COD decision: flag to Komal before implementing - not default.
WhatsApp Business API	Third-party vendor required. Recommended: Interakt or Gupshup. All 8 message templates must be submitted to Meta for approval before any message is sent. Template copy in the WhatsApp Complete Specification v1.0 document enclosed.
Search	Algolia or Typesense. Full-text across: ritual guide titles and bodies, kit names, puja types. Must handle Hindi transliteration fuzzy match (e.g. 'karwa chouth' → 'Karwa Chauth').
Analytics	Mixpanel (user journey events) + Google Analytics 4 (traffic). Both required from Phase 1 launch. Events spec in Section 7.
Storage	AWS S3 or Cloudflare R2. WhatsApp message images resized to 800×418px (16:9) and served from CDN with content-addressable URLs.
Audio	MP3 files hosted on S3/CDN. Audio player: Howler.js or equivalent. No third-party audio platform. EN and hi_IN versions of articles.

Panchang platform - three-phase architecture

Panchang infrastructure evolves in three phases matching user growth. Phase 1 uses a third-party API. By Phase 3 the data is owned internally. Never expose Panchang API directly - always proxy through Tapa's backend layer.

	Architecture
Phase 1 (0–5K users)	Third-party Panchang API proxied through Tapa backend. Internal data model standardised. Caching layer. DB snapshots. CMS interpretation layer connecting data to articles and products.
Phase 2 (5K–20K users)	Precompute 12–24 months of Panchang data. Festival knowledge graph linking festival → deity → tithi → ritual → samagri → articles. Recommendation engine. Multi-city support. Push notifications.
Phase 3 (20K+ users)	In-house Panchang engine (Swiss Ephemeris or validated astronomical library). Editorial override workflow. Offline Panchang (local storage of upcoming data). AI ritual assistant grounded in Panchang context.

internal API endpoints (must remain stable even if underlying provider changes):

	Returns
/panchang/today	Full Panchang for today, keyed to city. All 8+ fields.
/panchang/date/:date	Panchang for a specific date.
/panchang/festivals	Upcoming festivals list with dates and countdowns.
/panchang/festival/:slug	Festival detail with linked article, kit, purohit booking.
/panchang/ekadashi	All Ekadashi dates for the current year.
/panchang/upcoming	Next 10 observances from today.
/panchang/calendar/:month	Full month vrat calendar.

1 · LIVE: 1 August 2026

Edge Layer

Guides + Panchang · No commerce · No payments

1 - scope

the knowledge layer. No commerce, no payments, no booking. The platform earns its credibility with users through editorial quality before asking for money. Ritual Kits pre-booking (Phase 2) builds on this credibility foundation.

For Phase 1	Testing of Phase 2 – In parallel
Edge - all 12 sections	Ritual Kit purchase or payment of any kind
Guides article template - all components	Purohit booking form – basic with smart fields that can filled even via whatsapp forms
Subscriptions live in CMS at launch	WhatsApp subscription paid flow
Guides - landing, vrat calendar, live API data	Bhajan Mandali
Checkout - results and no-results states	COD or any checkout
Guides - phone OTP login and logout	Account-level personalisation (Phase 2+)
Guides - saved rituals, stat tiles	Push notifications (Phase 2+)
Guides - all 7 blocks	Multi-city Panchang (Phase 2+)
Guides - impression tracking (localStorage)	

language toggle - shared state	
counter - sessionStorage persistence	
checklist - checkboxes + WA share + PDF download	
kit shelf - pre-launch teaser state with Notify Me capture	
prayer - EN + हिं per article	
news - Mixpanel + GA4 from day one	
first responsive + desktop layout	

1 - page requirements

Page - scroll order (locked, no deviations)

	Requirement
Announcement bar	CMS string. Dynamic - switches for seasonal variants (Sawan, Navratri, Diwali). Always visible. Never dismissable.
Navigation	Logo + 4 category tabs + search + bell + LOGIN. Sticky. z-index 40. Desktop: single row. Mobile: two rows (logo/icons row + search + bell + LOGIN row). Ritual Kits tab shows 'Launching soon' badge until kits_launched=true.
Hero	Today's featured ritual from CMS. Full-bleed image. Gradient overlay. Title + subtitle + trust badges + 3 CTAs. Desktop: left to right gradient. Mobile: top-to-bottom. Never a static hero. Always a live CMS entry.
Trust badge strip	4 badges in fixed order: Scripturally sourced · Pratha-aware · Fear-free · Shraddha-first. Horizontal scroll on mobile. Never reorder.
Vrat calendar - first fold	Live API data. 4 cells: Tithi, Paksha, Nakshatra, Sunrise. Next vrat row below with countdown. Default city: Delhi-NCR. Falls back to last cached values. Never blank cells.
Ritual Kits shelf	Pre-launch teaser until kits_launched CMS flag = true. Shows launch date, value prop, Notify Me CTA. Post-launch: horizontal scroll of product cards. State switch = CMS flag only, no code deployment.
Featured ritual's ritual journey	6 steps from CMS per featured ritual. Done / active / pending states. Horizontal scroll on mobile.
Ritual Guides	4-card horizontal scroll (mobile) / 4-column grid (desktop). CMS-curated, not algorithmic.
Footer - link bar with Purohit strip	Dark card. Always visible as a strip. Links to category landing (shows 'Coming soon' until Phase 4).
WhatsApp nudge	Disappears at 3 impressions (localStorage counter). Disappears permanently after subscription. Context copy changes per season.

ore by category	2×2 mobile / 4-column desktop. Live counts from CMS.
er	7 blocks. Full spec in Section 5.5 of this document.

des - article template

most important page in Phase 1. Every component must be complete before launch. Partial builds are not acceptable.

ent	Requirement
umb (sticky)	Sticky below nav. '◀ Ritual Guides' left. EN/𑀓𑀲 toggle + 📌 Save right. z-index 39. Background: white.
anner	260px mobile / 460px desktop. Full-bleed CMS image. Left-to-right gradient (desktop), top-to-bottom (mobile). Share pi right.
ip	4 pills: source colour dot + label. Article-specific. Pulled from CMS article fields.
roll bar	6 action buttons: Buy Ritual Kit (pink, greys when no kit) · Book Purohit (hidden until launch of phase 4) · Download (PD WhatsApp (share) · Save · Share. Horizontal scroll on mobile. Always visible.
lector	2 cards: 'Doing this today' / 'I want to learn'. Logs intent via analytics at launch. Does NOT filter content. aria-pressed on
r	Dark bar. Pink play circle. EN/𑀓𑀲 mirrors breadcrumb toggle. Audio served from S3/CDN. Howler.js or equivalent.
nce quote card	Dark background. Pull quote from CMS. Attribution line with source.
a card	Amber-light background. CMS text. 'No Sanskrit required' note always present.
3 cards	Nirjala / Sajal (recommended, green) / Phalahar. Equal visual weight. Note below: no nirjala mandate.
ps - numbered	Step number in amber circle. Step title + description. Inline Pratha note where relevant. Mantra chip at abhishek step.
chip	Dark background. Devanagari (amber, 18px) + transliteration + meaning. Listen button (pink). Counter with – / count / label. sessionStorage per slug+mantra.
image	Full-width image band from CMS. Caption overlay.
ha card	Two-column: image left + title / source / Listen / Read buttons right. Desktop: side by side. Mobile: stacked.
checklist	Native checkboxes styled with CSS. sessionStorage persistence. WA share + PDF download buttons. 8 items max per artic
ownload CTA pair	Below samagri. Pink (Buy Kit) + Dark (Download). Full-width on mobile. 50/50 on desktop.
Common worries	Per myth: pink question card above + green answer card below. Inline per myth, not a separate page.

Source layer	Collapsed by default. CSS-only toggle (onclick class toggle). Amber-light header. Expands to full source + DPB table. 'Read source text ↗' button.
Pujans	2-column grid (desktop) / vertical list (mobile). Live / Coming soon badges from CMS.
Top nudge	Ritual-specific copy from CMS field ritual_whatsapp_teaser. Impression-tracked.
Purohit bar (mobile)	Fixed bottom. 80px body padding-bottom. Only on article pages. Not on homepage or Panchang.
Sticky bar (desktop only)	Sticky at top:84px. Contains: credibility card (source, confidence, DPB legend, tags) + Buy Kit CTA + Download CTA + sample checklist + Purohit card. Replaces sticky bar on desktop.

Calendar - page requirements

Component	Requirement
Calendar dashboard	Full-width dark band. 6 cells: Tithi, Paksha, Nakshatra, Yoga, Sunrise, Sunset. Each: key + value + sub-label. Next vrat strip below: 3 upcoming events with countdowns. City selector (default Delhi-NCR, tappable). 'Download 2026 calendar' button.
Breadcrumb (sticky at 60px)	Breadcrumb left. 4 sub-category tabs right: Vrat Calendar / Observance Calendar / Tithi Guides / Seasonal Guides.
Calendar - filter chips	All / Ekadashi / Sawan Somwar / Pradosh / Purnima / Amavasya / Teej / Eclipse. Filter chips - JS filter on pre-loaded data.
Calendar item	Date block (day/number/month) + classification dot + name + contextual badge + sub-line (Sanskrit calendar context + source) + countdown pill + 'View guide →' link. Today row: pink-tinted bg + 'Today' badge.
Calendar card (desktop)	Sticky. Full 8-field Panchang card (dark) + Muhurat card (auspicious windows + Rahu Kaal) + Rahu Kaal alert + Eclipse alert (contextual, August only) + WA nudge.
Calendar PDF	PDF of full 2026 calendar. Static file served from S3. Free download, no login required.
Calendar event badges	Pink for ≤7 days. Amber for >7 days. 'Today' for current day. Live calculation from today's date.

Calendar - 1 - CMS content model

Calendar items must be created in the CMS before any content is published. The editorial team populates them. The frontend reads them. Missing fields = broken UI

	Type + required / optional
Calendar item	Text • Required • Ritual name in English
Calendar card	Auto-generated from title • Unique • URL path segment
Calendar event	Text • Optional • Ritual name in Hindi

	Select: DHARMA / PRATHA / BHRANTI / MIXED · Required
_source	Text · Required · e.g. 'Shiva Purana'
ub	Text · Required · e.g. 'Rudra Samhita / Parvati Khanda'
ce_score	Integer 1–5 · Required for DHARMA articles · Blank for PANCHANG
ce_note	Text · Required · One line explaining the score
_scope	Text · Required · e.g. 'North India - Rajasthan, UP, Bihar, Haryana'
age	Image · Required · Min 1600×900px. Frontend resizes per breakpoint.
title	Text · Max 120 chars · Appears below title on hero
paragraph	Rich text · Required · First editorial paragraph
nce_quote	Text · Required · Pull quote for the significance card
nce_attribution	Text · Required · e.g. '- Shiva Purana, Rudra Samhita / Parvati Khanda'
a_text	Text · Required · First-person sankalpa in plain English/Hindi
note	Text · Required · The Bhranti correction on nirjala
	Array of: step_number, step_title, step_desc, step_note (optional), mantra_chip (optional)
devanagari	Text · Optional · e.g. 'ॐ नमः शिवाय'
transliteration	Text · Optional · e.g. 'Om Namah Shivaya'
meaning	Text · Optional · One line meaning
audio_en	Audio file · Optional · MP3
audio_hi	Audio file · Optional · MP3 Hindi version
	Array of: item_name, item_note (optional), is_optional (bool)
	Array of: myth_question, myth_answer
arma_elements	Text · What is Dharma in this article
tha_elements	Text · What is Pratha
ranti_corrected	Text · What misconceptions are corrected
pujans	Array of: slug, is_live (bool)
hatsapp_teaser	Text · Max 120 chars · For WhatsApp nudge + T2 template body

whatsapp_hook	Text · Max 120 chars · For T4 festival countdown
image_wa	Image · 800×418px (16:9) · Auto-resized from hero. Can be overridden.
whatsapp_active	Boolean · Whether to trigger automated WA sends
product_slug	Text · Slug of linked Ritual Kit product. Empty if none.
reminder_days_before	Integer · Default 1. Set 7 for major festivals.
festival_flag	Boolean · If true, also sends T4 festival countdown
audio_en	Audio file · Required for Phase 1 · MP3
audio_hi	Audio file · Optional · MP3 Hindi version
image	Image · Optional · Full-width image for vidhi close
image	Image · Optional · Illustrated Puranic scene for katha card
article_date	Date · Required for seasonal articles
show_hero	Boolean · Whether to show in homepage hero carousel
rotation_order	Integer · Sort order for homepage hero rotation

Phase 1 - required articles at launch (6)

	Observance date
Omwar Vrat	Weekly (Mondays in Shravan)
Tej	15 August 2026
Shraddhami	17 August 2026
Putrada Ekadashi	21 August 2026
Tej	23 August 2026
Explainer (Panchang)	12 + 28 August 2026

Content and all CMS field values are in the Website Content v1.0 document. Hero images and audio files for all 6 articles must be provided to the tech team to allow testing before the 1 August launch.

1 - milestone checklist

	Milestone	Owner
	CMS platform selected, provisioned, and content model created	Tech
	Panchang API vendor contracted and test calls returning valid data	Tech
	Hosting environment live (Vercel/AWS) + domain + SSL	Tech
	Analytics (Mixpanel + GA4) configured with event schema from Section 7	Tech
	Homepage - all 12 sections built, responsive, QA-tested	Dev
	Ritual Guides article template - all components built, interactive	Dev
	Panchang page - live API data, sidebar, filter chips, calendar list	Dev
	Auth - phone OTP login / logout / skip flow tested end-to-end	Dev
	Account - saved rituals, stat tiles, row list, empty states	Dev
	Footer - all 7 blocks	Dev
	EN/हि toggle - shared state across breadcrumb + audio bar	Dev
	mantra counter - sessionStorage, restore on back navigation	Dev
	WA nudge - impression tracking, localStorage, suppression logic	Dev
	10 articles created for CMS - all fields populated	Editorial + RI Head
	Hero images (10 articles) + audio files (EN) delivered to tech team	Content
	Full QA pass - mobile (iOS Safari, Android Chrome) + desktop (Chrome, Firefox, Safari)	QA
	Soft launch to internal team - bugs identified and resolved	All
	Phase 1 LIVE - thetapaco.com publicly accessible	All

2 - SOFT LAUNCH: 15 August 2026 · FULL: 3 October 2026
erce
king → Full commerce · 14 Ritual Kit SKUs · WhatsApp subscription

2 - scope

For Phase 2	Out of scope
Product shelf - switches from teaser to live product cards on kits_launched flag	Purohit booking
One kit product page - contents, price, pincode check, quantity, add to cart	Bhajan Mandali
Item list, subtotal, delivery, total, empty state	
Payment - address form, UPI/card/netbanking payment, order summary	
Confirmation - order number (TK- prefix), delivery date, what happens next	
WhatsApp capture (Notify Me) → SMS/WA notification when kits go live	
WhatsApp subscription - opt-in screen, payment, success screen (Oct 3)	
WhatsApp message templates submitted to Meta for approval	
WhatsApp CMS tool for marketing team - message composer, image upload, approval	
WhatsApp messaging calendar - automated sends configured	
Logistics integration - pincode check, ETA, order tracking	
Product SKUs in CMS with images, contents, pricing	
WhatsApp Officer contact added to footer legal row	

Kit product - full specification

	Requirement
Product page URL	/ritual-kits/[kit-slug] - e.g. /ritual-kits/hariyali-teej
Page heading	[Festival name] Ritual Kit - never 'Puja Kit'
Section heading	'What's in this kit' - never 'Contents' or 'Includes'
Item format	Item name · function. Both always present. e.g. 'Sindoor · For Parvati's offering'
Price display	₹[price] large. MRP struck through below. Always ₹ symbol, never Rs. or INR.
Quantity	Stepper: – / count (min 1) / +
Availability check	Input field. API call to logistics partner. Returns: available (delivery days) or unavailable (message + notify).
Delivery note	Specific: '2–3 days. Order before 2 pm for next-day delivery to [city]'. Never 'express delivery'.

Cart CTA	'Add to cart'. Lowercase. Not 'Add to bag'.
Buy CTA	'Buy now - ₹[price]'. Price always in the CTA.
Images	Min 3 images per kit. Gallery with thumbnail scroll.
Notify button	'Buy Ritual Kit' button greys out (not hidden) in article utility bar. Shows 'Notify me' state pre-launch.

	Requirement
	/cart
Intro	'Nothing here yet. Start with a ritual guide to find the right kit.' Links to Ritual Guides.
Kit details	Kit name + descriptor (item count + 3 key samagri items) + price + quantity stepper + remove.
	Calculated live on quantity change.
	'Free' if order ≥ ₹999. '₹49' below that. Rule configurable in CMS/admin.
Footer	One line below total: 'Samagri is ritually verified and sourced from trusted suppliers.'
Checkout CTA	'Proceed to checkout - ₹[total]'. Price always in CTA.
Continue shopping	'← Add more items' link.

Checkout	
	Requirement
	/checkout
Prayer box	/punyadaan (Add ₹11, 21, 51, 101, 501, 1100, 2100, xxx (add denomination of your choice not less than ₹11) for a child at Mithi Children’s Shelter
Address fields	Your name / Mobile number / House + Flat + Building / Area + Colony + Street / City / State / Pincode. Labels in this exact language. 'Delivery address' not 'Shipping address'.
Save address	Toggle: 'Save this address for next time'. Pre-fill on return visits.
Payment	UPI (pre-selected, show GPay / PhonePe / Paytm logos) · Credit/Debit card · Net banking. COD: do not build until Komal confirms decision.

Summary	Inline on right (desktop) / accordion above CTA (mobile). Shows kit, price, delivery, total.
CTA	'Confirm & pay - ₹[total]'. Price always in CTA.
Note	'By placing this order you agree to our Terms of Service and Privacy Policy.' Below CTA. Small text.
Payment processing	'Processing your payment... Do not close this screen.' Pink progress bar.
Payment state	'Payment couldn't be completed. You haven't been charged. Please try again.' Two retry options.

Order confirmation

	Requirement
	/order-confirmed/[order-id]
	'Order placed ✓'
Copy	'Your [kit name] is on its way.' Specific kit name. Not 'your order'.
Kit number	Prefix: TK- (Tapa Kit). e.g. TK-2026-0001. Show prominently.
Delivery estimate	'Expected by [specific date] · [City]'. Specific. Not 'in 2–3 days'.
What happens next (3 days)	1. 'You'll get an SMS when your kit is dispatched.' 2. 'Your kit will arrive with the ritual card for [festival name].' 3. 'We'll send you a reminder the morning of [festival date].'
Post-order message (post-order)	High-intent placement. Copy: 'Your ritual journey doesn't end here. Weekly reminders - ₹499/year.' Different from generic nudge.
Where ordered	In account under Booking History (same stat tile).

App subscription - opt-in flow

Subscription flow goes live October 3. The opt-in screen, nudge components, and impression tracking must be built from Phase 1. Payment flow added in Phase 2. All 8 requirements must be submitted to Meta as soon as Phase 2 build begins - approval takes 2–5 business days and must precede any live sends.

	Requirement
Screen URL	/subscribe
	₹499/year. Displayed large before value props. Never reveal it at the bottom.
Offer badge	🎁 Free for our first 100 subscribers - You're #[N]. Show only when count < 100. Requires subscriber_number field in DB.

ops	4 lines: ✓ Weekly vrat and tithi alerts · ✓ Festival countdown · ✓ Seasonal ritual guides · ✓ Reply STOP to cancel anytime
eld	Label: 'Your WhatsApp number'. +91 pre-filled.
line	'By subscribing you agree to receive WhatsApp messages from The Tapa Co. (The Tapa Circle). Reply STOP to unsubscribe at time.'
e)	'Join free - The Tapa Circle'
d)	'Subscribe - ₹499/year'
t screen	UPI pre-selected. ₹499. 'Pay ₹499' CTA.
screen	'You're all set. ✓' + exact expiry date (DD Month YYYY) + 'WhatsApp is about to say Namaskar.' + 'Your first message is within minutes.'
ction on	1. Write subscription record to DB. 2. Fire welcome message (T1) via WhatsApp API within 5 seconds. 3. Log source_page for attribution.
ndling	When subscriber replies STOP: update wa_opted_out=true in DB immediately. Fire T8 (opt-out confirmation) within 60 seconds. Suppress all future sends. This is WhatsApp policy - non-compliance risks account suspension.

App - 8 approved message templates

es must be pre-approved by Meta before any message is sent. Submit all 8 simultaneously. Full body copy, variables, and Meta approval notes are in the Complete Specification v1.0 document. Template names below are the exact names to use in the Meta Business Manager submission.

e name	Category
le_welcome	UTILITY
al_reminder_eve	UTILITY
kly_panchang	UTILITY
ival_countdown	MARKETING
available	MARKETING
ewal_reminder	UTILITY
ry_final	UTILITY
out_confirmation	UTILITY

App - backend CMS marketing tool

	Requirement
rd - upcoming	Table: Date · Observance · Template type · Status (Auto-ready / Needs review / Approved / Sent). Colour-coded status badge
ulation	Daily cron at 12:00 am: reads editorial_calendar table. For any observance with ritual_whatsapp_active=true, creates draft se record. Populates: article hero image (resized to 800×418px) + article URL + kit URL from kit_linked_slug + teaser text from ritual_whatsapp_teaser.
override	Marketing team can upload a custom 800×418px image to override the auto-pulled article hero. Accepted: JPG, PNG. System v if crop required.
	Live WhatsApp mock-up showing header image, body, footer, and buttons. Updates in real time as team edits.
l gate	No message sends without status=approved. Approval requires a different user than the creator (two-person rule). Cannot se approve.
t filter	All active subscribers (default) · Subscribers who received a reminder for this festival (for T5 kit alerts).
	Post-send: timestamp, recipient count, delivery rate, button click rate per button. Stored in wa_delivery_log table.
essage per er per day	System enforces this. If two observances fall on the same day, system creates one combined message - never two.

2 - 14 Ritual Kit SKUs

red soon

e 2 - milestone checklist

	Milestone	Owner
	Phase 1 live. Notify Me capture active on kits shelf teaser.	All
	Payment gateway contracted (Razorpay/Cashfree). Test environment live.	Tech
	WhatsApp Business API vendor contracted (Interakt/Gupshup).	Tech
	All 8 WhatsApp templates submitted to Meta Business Manager.	Tech + Komal
	Hariyali Teej countdown WhatsApp image created (800×418px) and in CMS.	Marketing
	Kit product page, cart, checkout, order confirmation built and in QA.	Dev
	Logistics partner confirmed. Pincode check API integrated.	Komal + Tech

	Milestone	Owner
	WhatsApp template approvals received from Meta.	Meta (async)
	All 8 templates tested end-to-end in staging.	Tech
	Grievance Officer name and email confirmed and in footer.	Komal
	COD decision made and implemented (or confirmed as out of scope).	Komal
	kits_launched CMS flag = true (pre-booking opens). Shelf switches to product cards.	Komal
	SOFT LAUNCH: pre-booking live. Payment accepted. WA subscription nudge active.	All
	All 14 kit SKUs in CMS with images, contents, full CMS fields populated.	Content + Komal
	Raksha Bandhan WhatsApp message manually composed and approved in CMS.	Marketing
	Full commerce live - all SKUs available, no pre-booking caveats.	All
	WhatsApp subscription paid flow live (₹499/year).	All
	FSSAI compliance check complete for any food items in kits.	Komal + CA

3 - FULL LAUNCH: 3 October 2026

commerce

live · WA subscription paid flow · No gating or pre-booking

3 - scope

not a new build - it is the removal of all pre-launch gates and the completion of any Phase 2 items that were deferred. By October 3, every kit is live, the flow works without caveats, and the WhatsApp subscription paid flow is fully operational.

Deliverables	Notes
Remove all 'Launching soon' and pre-booking language from kit shelf	kits_launched flag already controls this - no code change needed.
WhatsApp subscription paid flow fully live	₹499/year. First 100 subscribers free. Auto-renewal decision implemented.
All kit SKUs live with full inventory management	Stock counts, out-of-stock states, restock notifications.
Order management dashboard - internal admin	View orders, update status, trigger dispatch SMS.
Kit page - My Subscriptions tab shows WA subscription with expiry	
WhatsApp automation (T6 and T7 templates) tested and live	

Performance audit - Core Web Vitals targets met	LCP < 2.5s, FID < 100ms, CLS < 0.1
Content for Phase 1 articles	Audio (🎧) + body text in Hindi where available.
Order or promo code system (optional, Komal decision)	Not built by default. Decision needed before October 3.

Phases 4 & 5 · TBD - After Phase 3 completion
 with Purohit + Bhajan Mandali
 Purohit bookings · Pandit network · Performer network

Phases 4 & 5 - architecture scoped, timeline TBD

Phases 4 and 5 are architecturally scoped now so the team builds Phase 1–3 infrastructure that is compatible. The start date is contingent on Phase 3 completion and review.

	Architecture requirement to build into Phase 1–3 now
Booking	DB schema for: purohits, bookings, puja_types, availability_slots, pandit_languages. Build tables in Phase 1 even though the UI is not live.
Tab visibility	CMS boolean flag purohit_tab_visible = false. Build the flag handler. Show tab when flag = true (Phase 4 launch).
Performance constraints	Some pujas (Rudrabhishek, Navratri Ghatsthapna) can only be performed at specific times. Backend must enforce and grey unavailable slots. Schema required now.
Inventory management with reservations	Purohit booking bundles a Ritual Kit. Kit inventory must be aware of booking-reserved stock. Inventory model must support this from Phase 2.
Language support and filtering	Does selecting 🎧 in the app filter pandits to Hindi-only? Decision needed before Phase 4 build. DB schema must support languages[] array on purohit records.
Mandali booking model	Instant confirm vs request-based (Check availability). Decision affects the entire post-submit flow. Must be decided before Phase 5 build begins.
Order prefix	TP- (Tapa Purohit) and TM- (Tapa Mandali). Reserve these prefixes in the order_records schema from Phase 2.

Phase 4 - Puja with Purohit (scoped)

	Key requirement
--	-----------------

landing	/pujan-with-purohit. 4 puja rows: Rudrabhishek (Vistrit only ₹14,000) · Satyanarayan Katha (₹7,100 or with Havan ₹12,000) · Musical Mandali (₹8,000) · Navratri Ghatsthapna (₹9,500). 'Puja not listed? Chat with us' → WhatsApp.
ail	Variant cards with price + duration. Vidhi overview. Samagri included toggle. 'Continue → select pandit' CTA.
election	Pandit cards: name, rating, puja count, languages. Date picker. Time slot selector (backend-enforced). 'Wish to chat?' WA escape hatch mid-booking.
booking	Summary + price breakdown + payment. 'Confirm & pay - ₹[price]'. Cancellation policy link required.
confirmed	TP- order number. Pandit name + date + time. 3 what-happens-next lines: pandit calls 24hr before, kit arrives day before, WA reminder morning of.
- Booking	Live order status. Cancel option (per cancellation policy).

5 - Bhajan Mandali (scoped)

	Key requirement
landing	/bhajan-mandali. 6 mandali types: Sundarkand, Mata Ki Chowki, Shyam Darbaar, Ram Darbaar, Shiva Stotra Satsang, Generic mix. 'Your choice not listed? Chat with us' → WhatsApp.
booking	Single page: what's included, starting price, Date / Venue / Expected guests fields.
t	'Check availability' CTA (request-based, not instant confirm - pending final decision). TM- order prefix.
confirmed	Request received state. Confirmation within 24 hours. WA nudge with generic copy (no recurring-date hook).

se schema - key tables

bles from Phase 1 even if some are only populated in later phases. The schema must not require destructive migrations between phases.

	Type + notes
	UUID · Primary key
	VARCHAR(15) · E.164 format (+91XXXXXXXXXX) · Unique · Indexed

	VARCHAR(100) · Optional · From account profile
e_pref	VARCHAR(5) · Default 'en' · Values: 'en', 'hi'
	VARCHAR(100) · Default 'Delhi-NCR' · For Panchang localisation
at	TIMESTAMPTZ · Auto
ve	TIMESTAMPTZ · Updated on each session

uals

	Type + notes
	UUID
	UUID · FK → users.id
ug	VARCHAR(200) · Slug of saved article
	TIMESTAMPTZ

itual Kits)

	Type + notes
	UUID
umber	VARCHAR(20) · TK-YYYY-NNNN format · Unique
	UUID · FK → users.id
	JSONB · Array of {kit_slug, kit_name, quantity, unit_price}
paaise	INTEGER · Amount in paise (avoid float)
paaise	INTEGER
se	INTEGER
_address	JSONB · {name, phone, line1, line2, city, state, pincode}
_method	VARCHAR(20) · 'upi' / 'card' / 'netbanking' / 'cod'

	BOOLEAN

cs events - required from Phase 1

t below must be firing from launch day. Mixpanel for user journey events. GA4 for traffic. Properties listed are the minimum required. Add more but n

vents

ne	Trigger
ewed	User opens a ritual guide article
ved	User taps  and saves an article
ared	User taps Share
ected	User selects a mode on article page
hant_started	User taps Listen & chant
ount_updated	User increments mantra counter
item_checked	User checks an item in samagri checklist
downloaded	User downloads samagri PDF
whatsapp_shared	User shares samagri to WhatsApp
ce_layer_opened	User expands the Tapa intelligence layer
g_city_changed	User changes city in Panchang
g_calendar_downloaded	User downloads the PDF calendar

query	User submits a search
result_clicked	User taps a search result
wa_nudge_impressed	WA nudge renders
wa_nudge_clicked	User taps WA nudge
wa_nudge_suppressed	Nudge hidden at 3 impressions
otp_flow_started	User initiates phone OTP flow
otp_flow_completed	OTP verified
continue_tapped	User taps Continue without saving

Events (additional)

Event Name	Trigger
kit_page_viewed	User opens a kit product page
add_to_cart_clicked	User taps Add to cart
cart_opened	User opens cart
checkout_started	User taps Proceed to checkout
payment_method_selected	User selects payment method
payment_confirmed	Payment confirmed
payment_failed	Payment failed
subscribe_started	User taps WA nudge and reaches opt-in screen
subscribe_completed	Subscription confirmed
subscribe_failed	Payment failed on subscription
wa_message_sent	WhatsApp API confirms delivery
wa_message_clicked	Subscriber taps a button in WA message

Decisions - required before each phase

Each decision block below blocks a specific phase. No decision should be deferred past its block date. Owner is the person responsible for making the decision - not necessarily the person implementing it.

Open decision - required before this phase	Blocks
WhatsApp Business API vendor - Interakt, Gupshup, or other. Template submission takes 2–5 days in vendor account creation. URGENT.	Phase 2 · Block: 5 Aug
PO (Cash on Delivery) as payment option - yes or no. Affects payment gateway config and logistics.	Phase 2 · Block: 10 Aug
Primary logistics partner - who delivers the kits. Affects pincode check API, ETA calculation, batch SMS.	Phase 2 · Block: 10 Aug
GDPR / AI compliance - WIP	Phase 2 · Block: 3 Oct
Compliance Officer - name and email address for legal footer. Required under Consumer Protection E-commerce Rules 2020 before any commerce is live.	Phase 2 · Block: 14 Aug
Auto-renewal for WhatsApp subscription - auto-charge at year-end (requires payment mandate) or manual and re-subscribe. Affects payment gateway integration.	Phase 2 · Block: 3 Oct
Language source of truth - EN/हिंदी account-level default vs per-article override. Currently both exist. One must be the source of truth. Affects audio player + content delivery logic.	Phase 1 · Block: 25 Jul
Panchang API vendor – finding alternate for Drik Panchang API access and test calls. Identify fallback if API is unavailable.	Phase 1 · Block: 18 Jul
Audio player library - Howler.js or equivalent. S3 or CloudFront for hosting audio files. MP3 files for articles must be produced before 25 July.	Phase 1 · Block: 21 Jul
Article selector behaviour - records intent only at launch vs server-side content reorder when available. Decision affects architecture of the article page component.	Phase 1 · Block: 21 Jul
Referral / promo / referral code system - yes or no for Phase 3. If yes, needs schema additions in Phase 2.	Phase 3 · Block: 15 Sep
Hindi language matching - does हिंदी toggle filter pandits to Hindi-only. Requires DB logic and pandit file languages[] array.	Phase 4 · Block: TBD
Rajman Mandali booking model - instant confirm or request-based. Changes the entire post-submit flow.	Phase 5 · Block: TBD

Non-negotiables - what cannot change without written approval

These decisions are locked. Any deviation requires written sign-off from Komal Gupta before implementation. Do not interpret, adapt, or substitute.

Decision locked	Why
-----------------	-----

Links (Section 1.4)	Brand integrity. All HTML reference files validate against these. A designer or developer who changes them without approval is out of scope.
Order on homepage (3.2)	Commerce follows knowledge. Panchang is the first-fold data layer. This order is the product decision, not a design choice.
Classification system	This is the platform's editorial credibility. No article can be published without a valid DPB tag. Confidence $\leq 2/5$ cannot be tagged DHARMA.
Error copy in all states	Error messages, empty states, loading states, confirmation messages - none can imply ritual failure, consequence, or urgency born of fear. Every string is subject to the three-test rule (fear / clarity / source).
CTA to buy before article on article pages	The Utility scroll bar (Buy Kit, Book Purohit) cannot appear above the article fold. Commerce CTAs appear after or alongside content, never above it.
OTP only for authentication	No email, no social login, no password. This is a deliberate product decision - reducing friction for the Indian mobile-first user while keeping the account system simple.
First person approval gate before WhatsApp sends	No message can auto-send without human review and a second-person approval. This is policy, not a feature.
WhatsApp share price	Locked. Not ₹99. Not ₹199. Not ₹399.
Number prefixes TK-	TK for Tapa Kit. TP for Tapa Purohit. TM for Tapa Mandali. Locked across DB, order confirmation UI, and customer SMS.
Launched flag must be visible, not a code comment	The marketing team must be able to switch the shelf from pre-launch to live without a developer touching the codebase.
Legal Officer contact in footer	Required by law (Consumer Protection E-Commerce Rules 2020). Must be present before any commerce page is publicly accessible.
WhatsApp handling must fire T800 in 10 seconds	WhatsApp policy. Account suspension risk if violated.

It doesn't demand fear. It demands devotion.

Every line of code, every copy line, every API response, and every empty state on this platform serves that principle. Build accordingly.
